

COMBUSTION TECHNOLOGY

lucky number 13

Combustion Technology recently installed a gas line and commissioned 10 Riello Burners BS 3's and GS 20's at the Pick 'n Pay Support Bakery in Isando Johannesburg.

Macadams Baking Systems, based in Blackheath Cape Town has a total of 13 ovens to install at the Support Bakery.

Fish Africa was held at the Cape Town International Convention Centre from 24 - 26 October 2007.

Once again Combustion Technology was exhibiting at the show. This two-yearly event, combining fishing and aquaculture technology, is now established as the main point of access to the growing Southern African market for international companies.

This year Adam Leightley joined us from our Johannesburg office to man the stand and meet all

our guests. In the short time that Adam has been at Combustion Technology he is already on his third exhibition! He is definitely becoming our resident expert on manning exhibition stands!

This year's Fish Africa show is timely as:

- Almost all of the fish quotas in South Africa have now been awarded to fishing companies on a long-term basis and are beyond dispute;
- Investment is flowing into the fledgling fish farming industry; and
- The workboat and maritime sector is gathering pace.

"The show was good for Combustion - we managed to secure a number of orders for burners and boilers at this show," says Adam.

One of the many Impressive stands at the exhibition

Autoflame Sites

Dewald Lubbe returned to Combustion Technology on 1 November 2007. Dewald will be responsible for all the Autoflame clients around the country. He will, in time, be visiting all the Autoflame sites to ensure that they are running correctly and efficiently.

Any Autoflame customers experiencing problems or would like to discuss their efficiencies are welcome to contact Dewald on 021 715 3171. Welcome aboard Dewald!

echo floors

Adam Leightley has had a busy and successful year at Combustion Technology. Adam recently sold a 2 Ton Steam Boiler with a Riello P 200 burner to Echo Floors.

Echo Floors uses steam in the process of curing the concrete slabs they manufacture at their plant in Muldersdrift, just outside of Johannesburg.

think green

Some Interesting Facts

- * Up to 60% of the rubbish that ends up in the dustbin could be recycled.
- * The unreleased energy contained in the average dustbin each year could power a television for 5,000 hours.
- * On average, 16% of the money you spend on a product pays for the packaging, which ultimately ends up as rubbish

- # 1 recycled tin can would save enough energy to power a television for 3 hours.
- # 1 recycled glass bottle would save enough energy to power a computer for 25 minutes.
- # 1 recycled plastic bottle would save enough energy to power a 60-watt light bulb for 3 hours.
- # 70% less energy is required to recycle paper compared with making it from raw materials.
